Obsoletes: none

LINK NUMBER ASSIGNMENTS

Today Steve Crocker asked me to announce that from now on link numbers 2-71 (decimal), inclusive, are to be valid for use in connections. Accordingly, the Host-Host Protocol Document, which I am currently writing, will contain the following "declarative specification".

Links are assigned as follows:

Link Number	Assignment		
0 2-71	Control link		
1, 72-190	Available for connections Reserved-not for current use		
1, 72-190	To be used only for measurement		
171	work under the direction of the		
	Network Measurement Center at UCLA		
192-255	Available for private experimental use
